

UTAH GROUND WATER ASSOCIATION

The Advocate

FALL 2017 EDITION

LETTER FROM THE PRESIDENT

KYLE WIDDISON

I am writing today as summer time winds down. We are currently working at a ski resort and had 6" of fresh snow trying to get to the well site. If this is an indication of this fall and winter we may very well be in for a tough winter. Do your best to make your equipment ready for the cold months ahead. Do a little maintenance and maybe a couple of upgrades. It will make your life a bit easier and you'll sleep better.

I remember the story of the four lumber jacks. Their camp boss, disappointed in the production from this crew decided to have a contest. Each man was tasked with chopping down one of four large trees. Each were the same size and height, about 4' around at the buttress. Each were given just an 8 hour shift to accomplish the task. There would be a bonus for the jack that completed the task first, a full weeks pay in one day. The three young and tough lumberjacks were up and out the door on their way while the fourth man, much older and perhaps a bit wiser sat alone looking at his axe. Each of the young men went right to work knowing that the bonus was theirs. Several hours later the boss returned to check he observed just three of the lumber jacks were working. He was frustrated with the old man and decided that perhaps it was time for him to find other work. He went to where the man was still seated and asked with some salty language "Why are you not working?" The old mans only response was " just about ready." At this point he got up and went to his assigned tree and within an hour had this large tree harvested.

(Continued on page 2)

LETTER FROM THE PRESIDENT KYLE WIDDISON

(Continued from page 1)

All this while the young, husky jacks continued their toil. Each stopped for a moment as the large giant fell and realized that the old man would receive the bonus. At the end of the shift each had accomplished the task but only the old man received the bonus. The three young men, still full of energy and determination, went and asked why the old man had delayed so long to start? Was he just toying with them? Did he have some secret? With just a few words and a subtle smile the wise old man simply said. "I spent 4 hours sharpening my axe."

You have perhaps heard this story before but it is a valuable life lesson about preparation. If we think about this parable there may have other lessons hidden within that could cause us to think a new thought and perhaps even make a positive change to the way we do things.

Yesterday we had the tragedy in Las Vegas where a crazed man opened fire on a crowd of concert goers and killed and wounded many. I struggle, like each of you to understand how this could happen or what we as a society could possibly do to prevent this in the future. I don't suppose I have any answers to this impossible question but I do know this. Do your best to be observant to your surroundings where ever you are and where ever you go. Be aware of the closest exits and develop a plan to escape from any place should an emergency of any type occur. Keep your family close to you. You are their protector and need to do all you can to "be prepared". Do not go through life afraid but instead choose to live life to the fullest and for as long as your time lasts here on this green earth.

M. Kyle Widdison

Your #1 Source for Goulds & Pentair in Utah!

Residential pumping products and accessories from Mitchell Lewis & Staver are designed to meet your home and domestic needs—from keeping basements dry to dealing with water quality problems. We carry the pump solutions that make your turf and irrigation projects a success.

We carry a full line of pumps, motors, controllers, and accessories for residential applications, and we have experts on staff to help you. Our technicians can even help you with testing water, diagnosing water treatment problems, and selecting the best solutions for your particular issue. For our ag & irrigation customers, we feature a product build center in Utah for all of your turbine and centrifugal pump projects.

Mitchell Lewis & Staver has been in continuous operation since 1882, and is a proud member of the UGWA.

Glens Falls, NY- Flomatic® Corporation is proud to announce that all of their **80E** check valves sizes ¼” thru 4” are now NSF/ANSI standard 61 certified for drinking water systems. This is in addition to NSF/ANSI 372 the low-lead standard as a weighted average of 0.25% lead content by dry weight. Flomatic® received the certification and is in compliance with “NSF/ANSI 61 – Drinking Water Standards” which is a set of national standards and establishes stringent requirements for equipment that comes in contact with potable water. The test uses different water pH levels to the more challenging chemical certification. When selecting equipment it’s very important to make sure all valves meet NSF/ANSI-61 standards for potable water. For many years Flomatic® has been committed to providing products that exceed the requirements for lead content and has excellent experience in manufacturing unleaded valve products. Flomatic® Valves is a company committed to preserving and improving the environment while producing valve products that meet the most stringent safety and health standards.

For more detailed information on Flomatic® valves or to obtain a copy of the new 2017 condensed valve catalog, visit www.flomatic.com, email them at flomatic@flomatic.com, call Flomatic® Corporation at 1-800-833-2040 or fax them at 1-800-314-3155. Also our listings are available at <http://pld.iapmo.org/> file numbers 7060 and 6249.

VFD Valves Noiseless America's first choice.

Patented submersible pump check valve for use on variable flow demand (VFD) systems and applications. Standard check valves will "chatter" and be noisy when the system goes to low flow, causing eventual failure. The unique valves are designed to minimize flow losses and hydraulic shocks in the pumping system. The exclusive patented poppet system ensures that the valve smoothly and automatically adjusts to flow changes and is noiseless at even very low flows.

Tapped Valves

1" - 4" Unique Patented Design VFD Valves
(Also available in Ductile Iron and Stainless Steel 1" thru 8")
