

UTAH GROUND WATER ASSOCIATION

The Advocate
SUMMER 2017 EDITION

LETTER FROM THE PRESIDENT KYLE WIDDISON

Presidents Message,

This year is certainly going to beyond the norm for all of us. Across the state we had above average rain and snow for the winter and then this summer has already produced many new record high temperatures with water producers finding it difficult to keep up with demand. We always hope that each contractor finds enough work to stay busy and to perhaps improve your lives a bit each year. From what I hear everyone is pretty busy with some feeling the pressure of too much work backlogged. Things up north here seem to be pretty normal with the usual panic calls in the night with customers out of water. I sometimes sit and ponder and am amazed at the system we all have helped construct here in the US. There really is nothing to compare with it anywhere in the world. It's something to be proud of, that we each play a small but vital role in providing such a vital resource to the masses'.

We continue to meet as your board of directors and all of us discuss ways that we can support and protect each of you and your way of life. On July 12th we met and I have to say I believe that we are getting better at having efficient smooth meetings. We were able to complete our business in just over an hour. No one raised their voice and I thought things went smoothly. The scholarship fund has for many years been a topic of considerable discussion. Sometimes these discussions have been heated and a bit tough. Through all of this we have been able to reach an agreement that we were all able to compromise and agree on that we feel is fair in the way we award these scholarships. We realize that that this agreement is not a perfect solution and several board members had to be willing to change their thoughts and feelings in the way the fund is managed. I want to express my thanks to the current and past board members for being

LETTER FROM THE PRESIDENT KYLE WIDDISON

(Continued from page 1)

willing to make those compromises in drafting a policy that will benefit the most people. One thing that we have always agreed on was the principle that the main reason we exist as an association was to provide these benefits to the membership and their families. We continue to make small changes to try and fine tune the rules that make the most sense. I give you one example. Since the beginning, our scholarship application form has said " must be **received** by June 15th". From time to time we have had members express that this deadline is tough to meet especially if this date falls on a weekend. We are aware that school ends at different times in different school districts and some end just a week or so before the deadline. We discussed what we might do to help this. We considered several options, these included the following: Move the due date to the 20th, or 25th or even the 30th of June. We also considered changing the form to read. " must be **post marked** by June 15th". After thoroughly discussing it we decided that for the 2018 year we would only change the application form to read "post marked". This would allow 3 and maybe 4 additional days to get the application in. This change was adopted and we will review it next year and see how it went and to see if additional changes are needed.

This year we received 11 applications for scholarships. We had in the fund just over \$16,000. This would allow us to award 8 scholarships. As previously agreed, we had Colette submit all of the applications to the financial aid office at Salt Lake Community College. They were kind enough to review and assign a ranking to each application. Each could receive a maximum score of 100 points. Once the applications were scored the top 8 were selected and awarded a scholarship. No board member was ever in possession of or reviewed the applications. We actually never see them. This was the best system we could come up with to make a fair, honest and open process. As always we feel badly for those not chosen but will always do our best to make this as fair as possible. We are proud to congratulate the 8 chosen and they will have already received letters and the funds by the time you read this. We now have Colette prepare the letters and each are personally signed by the president, past president and president elect.

In conclusion. I have noticed from time to time in the two large news papers up north they will run small articles about the awarding of scholarships throughout the state. I am going to attempt a draft press release and send to the two papers here. If I am successful in having it printed I will have Colette send link to all of the membership. I believe that this is a noble thing started by some of the earlier board members and their efforts should be applauded. Thanks for reading and we wish you all a happy and prosperous year.

M. Kyle Widdison

UGWA 2017 Moab Convention Report

UGWA's 2017 Moab PED and Convention was held on June 9-10 at the Moab Valley Inn. We had a decent turnout with about 15 drillers attending for the 6 continuing education presentations, along with great attendance by our supporting suppliers and vendors. Topics included updates on Utah's well drilling rules (Jim Goddard/Water Rights), "Keeping Your Mud Program Simple" including hands on mud testing and problem solving using mud samples from different geologic formations (Fred Rothauge, Hydro Resources), "Water Well Rehabilitation Using Chemistry" (Norman Howard, Kotey Chemical), submersible pump systems (Steve Price, Western Hydro), DOT safety and inspection protocols (Trooper Justin Jensen/Utah Highway Patrol), and the interactive and lively Well Driller Jeopardy (Thom Hanna, Johnson Screens). Presenters at UGWA events are volunteers. A big thank you to these individuals and their companies for volunteering their time and expertise for the training classes.

The Moab event is successful and fun because of the sponsorship and support we get from our UGWA member suppliers. We couldn't do it without their attendance and financial support. This year Todd Beeman and Beeman Equipment Sales sponsored the lunch during the classes. Western Hydro was a Platinum sponsor for the event and also the BBQ food sponsor. Thank you so much Western Hydro! Moab Bit & Tool also sponsored the event and provided the drinks at the BBQ. Mike Zimmerman and Zimmerman Well Service provided the BBQ. Please give them a big round of applause and tell them in person next time you see them.

The BBQ social was really special this year. The BBQ social was hosted by "The Holland's" and Moab Bit & Tool at the Holland's home in Moab. Thank you Stan and Gavin and Aaron. The Holland's backyard setting was absolutely gorgeous with giant trees, birds chirping, and friendly horses. We had over 40 UGWA members and families attend. Mike Zimmerman was once again the man with the BBQ. Mike spent the better part of day tending the goods, and turned out delicious ribs, chicken, and dutch oven potatoes. Plenty of everything to go around.

On Saturday 15 of us did a group ATV ride with Moab Cowboy Off-Road Adventures. Ken Green was the tour guide and entertained with great stories on the local history, landscape, geology, and fossils of the area. The ATV adventure was set up by Charlie Fox with Franklin Electric. Yeehaw, what a blast!! After the ATV ride, UGWA family and friends all rendezvoused at Lion's Park and Charlie and Franklin Electric treated us to unlimited tasty taco's. Charlie even had a taco grill made from a bullnose casing endcap made by a well driller in Idaho.

The Moab "Event" is a long standing tradition of UGWA. I hope everyone will consider coming next year, bringing their family, and making it a great time for the Utah water well industry.

UGA Annual Field Trip

Geology and Resources of the Wasatch: Back to Front

September 29 and 30, 2017

On Friday September 29, we will explore the Wasatch Back from Round Valley (Wasatch County) to Powder Mountain. On Saturday September 30, we will visit the Wasatch Front between Provo and North Salt Lake.

Topics include:

Water Resources

- Hydrogeology
- Pharmaceuticals in water
- Hot spring mineralogy, microbial environments and gases
- Evidence for Utah's only periodic spring
- Groundwater quality protection
- Chemical and isotopic evaluations

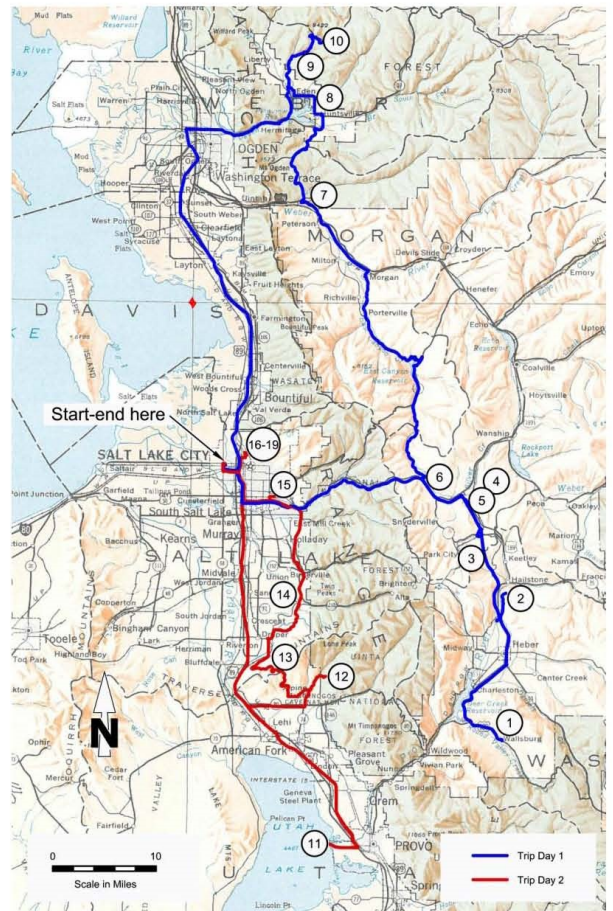

Geologic Hazards

- Fault and earthquake evidence
- Sinkhole investigation and remediation
- Landslides

Geologic Mapping and General Geology

- Geologic tools for mapping urban areas
- Volcanic deposits in Park City area
- Planned Fossil Park
- Earth Science teaching

This two day trip will start each day at the Natural Resources Building in Salt Lake City. Alternatively, participants may leave and return by van from the Provo area and meet others at the first stop each day. We will hold a social gathering (including appetizers and drinks) on Friday evening after the days' adventures. Also, UGA has reserved a block of ten rooms at a local hotel at a discounted price.

To register, please go to www.utahgeology.org and look for the link for the 2017 field trip. Space is limited so register early to reserve your spot! Registration closes September 1st.

Field trip cost will be \$150 and includes lunches, snacks, transportation by vans, UGA Publication 46 and field guidebook. Hotel cost is not included.

Field trip leaders: George Condrat and Neil Burk, Loughlin Water Associates, LLC

Mitchell
Lewis & Staver
 est 1882

Your #1 Source for Goulds & Pentair in Utah!

Residential pumping products and accessories from Mitchell Lewis & Staver are designed to meet your home and domestic needs—from keeping basements dry to dealing with water quality problems. We carry the pump solutions that make your turf and irrigation projects a success.

We carry a full line of pumps, motors, controllers, and accessories for residential applications, and we have experts on staff to help you. Our technicians can even help you with testing water, diagnosing water treatment problems, and selecting the best solutions for your particular issue. For our ag & irrigation customers, we feature a product build center in Utah for all of your turbine and centrifugal pump projects.

Mitchell Lewis & Staver has been in continuous operation since 1882, and is a proud member of the UGWA.

Glens Falls, NY- Flomatic® Corporation is proud to announce that all of their **80E** check valves sizes ¼” thru 4” are now NSF/ANSI standard 61 certified for drinking water systems. This is in addition to NSF/ANSI 372 the low-lead standard as a weighted average of 0.25% lead content by dry weight. Flomatic® received the certification and is in compliance with “NSF/ANSI 61 – Drinking Water Standards” which is a set of national standards and establishes stringent requirements for equipment that comes in contact with potable water. The test uses different water pH levels to the more challenging chemical certification. When selecting equipment it’s very important to make sure all valves meet NSF/ANSI-61 standards for potable water. For many years Flomatic® has been committed to providing products that exceed the requirements for lead content and has excellent experience in manufacturing unleaded valve products. Flomatic® Valves is a company committed to preserving and improving the environment while producing valve products that meet the most stringent safety and health standards.

For more detailed information on Flomatic® valves or to obtain a copy of the new 2017 condensed valve catalog, visit www.flomatic.com, email them at flomatic@flomatic.com, call Flomatic® Corporation at 1-800-833-2040 or fax them at 1-800-314-3155. Also our listings are available at <http://pld.iapmo.org/> file numbers 7060 and 6249.

VFD Valves Noiseless America's first choice.

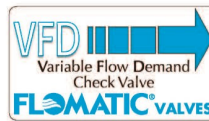

Patented submersible pump check valve for use on variable flow demand (VFD) systems and applications. Standard check valves will "chatter" and be noisy when the system goes to low flow, causing eventual failure. The unique valves are designed to minimize flow losses and hydraulic shocks in the pumping system. The exclusive patented poppet system ensures that the valve smoothly and automatically adjusts to flow changes and is noiseless at even very low flows.

Tapped Valves

1" - 4" Unique Patented Design VFD Valves
(Also available in Ductile Iron and Stainless Steel 1" thru 8")
