

The Advocate

SUMMER 2019 EDITION

LETTER FROM THE PRESIDENT

MIKE ANZALONE

I would like to start out by extending a huge thank you to all the people who came to Moab in June to enjoy the beautiful scenery and company of fun people in our industry. Thank you to the vendors who graciously sponsored the many great events and activities. Thank you to Chris Mikell for arranging speakers for the educational classes. I would like to thank the Holland's of Moab Bit for providing the facility for our great BBQ Friday night. It was an excellent location and much appreciated. Thank you Mike Zimmerman for doing the cooking at the BBQ. It was excellent! Thank you Gavin Holland for guiding the ATV tour on Saturday. Everyone had a great time and we hope to do the same trip again with him next year. Luckily everyone survived the day, even after the firecracker excitement in the canyon!

In this Presidents' message I would like to share with you the best business lesson I have ever received. Not long after my father passed away in 1998, I received a phone call from Laird Whipple who was dissatisfied with my brother for not showing up to do a job for a week and a half. The next morning after the call I went to Laird's place and did the thirty minute job. I went in his shop to give him his bill and he proceeded to give me a ninety minute "chewing out," the likes of which I had never had. He was extremely unhappy because my brother did not do what he said he was going to do, when he said he was going to do it. I got the unfortunate brunt of Laird's dissatisfaction. He was so upset he was throwing wrenches across his shop. This was also my wedding day, but that was later in the afternoon.

Laird was of the generation that appreciated and expected a person's

LETTER FROM THE PRESIDENT MIKE ANZALONE

(Continued from page 1)

word to be set in stone. He taught me that once trust is broken with a customer, or a fellow driller, it is difficult to ever recover. Business with that particular customer is in jeopardy as well as your reputation in the industry. Your name and your word is really all you have and should be protected at all costs. Ninety percent of our work received in this industry is by reputation and word of mouth.

I acknowledge that in our profession it is very hard to correctly predict how long each job will take and when we can move on to the next one, but communicating with customers and keeping their trust is extremely important. Customers would much rather get a phone call hearing you're running behind schedule and not showing up than not hearing anything from you at all concerning a job. Not doing what you commit to do permanently breaks trust with your customers and fellow industry associates.

Laird's next point was to prioritize. Do what is most important first in respect to each particular job. The most important things are different for all of us and each job. For some it might be paperwork, others it may be keeping on top of making sure your inventory is stocked. You must prioritize what is most important in your particular situation and the goals you have for your company.

I finish this by hoping everyone is doing well and having a fun safe summer. As summer ends, I encourage you all to reflect on your profession, family, and goals then strive to do better where possible.

Mike Anzalone
UGWA President
anzalonepumps@gmail.com

2019 MOAB CONVENTION REPORT

CHRIS MIKELL, P.G.

UGWA's 2019 Moab PED and Convention was held on June 7-8 at the Moab Valley Inn. On Thursday afternoon before the convention, Mike Anzalone organized a golf outing at "The Hideout" Golf Course in Monticello. The Hideout is one of the most scenic courses in Utah, with lots of elevation changes and challenges. We had 16 people show up for a wonderful afternoon of golf. Teams were organized on the spot. Friendly bets and threats soon followed. Golf was temporarily interrupted by an intense thunderstorm and lightening display. Scary! Thanks Mike A for organizing a fun golf outing.

On Friday we had a very good turnout for the 6 continuing education presentations, with 15 drillers and about 12 suppliers and consultants attending. The presentation topics included "Utah Water Well Drilling Rule Updates" (Jim Goddard/Water Rights), "The FORGE Geothermal Project near Milford" (Stefan Kirby, Utah Geologic Survey), "Efficient Water Wells" (Jeremy Kuhn, Roscoe Moss), "Water Well Drilling – Plan for Success" (Ron Petersen, Baroid/Halliburton), and "Driller Jeopardy" (Thom Hanna, Johnson Screens). For our last class, we did a field trip to the Moab Bit & Tool fabrication shop in Moab. Gavin and Aaron Holland gave us a history of how their grandfather, J.W. Holland, started the business and developed his own line of large diameter reverse-circulation drag bits. We heard about the changes over the years to drill bit designs leading to up the latest PDC drill bits they specialize in making, in addition to the complete line of hole openers, tri-cone bits, hammer bits, subs and stabilizers, and custom orders. We got a complete tour of the fabrication shop and equipment, and how they have grown and expanded their business. Thank you very much to Gavin and Aaron at Moab Bit & Tool for showing us your business.

Our BBQ social on Friday night was hosted by "The Holland's" and Moab Bit & Tool at the Holland's home in Moab. The Holland's backyard setting is absolutely gorgeous with giant sycamore trees, birds chirping, and friendly horses. The head count report was we had 55 UGWA members and families there. Mike Zimmerman provided the BBQ and Mike Anzalone provided the beans and fixings. The food was delicious. Plenty of everything to go around. Thanks Mike Z for your efforts on a fantastic BBQ for us. Thank you Stan and Gavin and Aaron (The Holland's) for a truly special place to share time together as a group.

On Saturday a group of 14 of us got together for an ATV ride hosted by Gavin Holland. We started at Onion Creek and toured the Kokopelli Trail to the back side of the La Sals. We ended at the old uranium mine that J.W. Holland was working at when he started Moab Bit & Tool. Amazing local history, landscapes, geology, and old mine works were seen by all.

(Continued on page 4)

2019 MOAB CONVENTION REPORT

CHRIS MIKELL, P.G.

(Continued from page 3)

Charlie Fox with Franklin Electric provided a great sandwich lunch at the mine. We rode over 50 miles! Yeehaw, what a blast!! Thank you Gavin for an awesome tour and day.

The Moab event is successful and fun because of the sponsorship and support we get from our UGWA member suppliers. This year we want to thank our platinum sponsors, Mitchell Lewis & Staver, Western Hydro, and 2M, and our lunch sponsor, Delco Western. We couldn't do it without their attendance and financial support. We also want to thank Moab Bit & Tool who sponsors us whenever we come to town, hosting our BBQ event and food/drinks. Mike Zimmerman for doing the BBQ. Charlie Fox for lunch on the ATV ride. Mike Anzalone for the golf outing. Presenters at UGWA events are all volunteers. Please give a big thank you to these individuals and their companies for supporting UGWA.

The Moab "Event" is a long standing tradition of UGWA. I hope everyone will consider coming next year, bringing their family, and making it a great time for the Utah water well industry.

Chris Mikell, P.G.

Logo Contest Winner Congratulations Chris DeKorver

Thank you so much to everyone who participated in our Logo Design Contest. We received 16 amazing choices from 4 very talented people.

All designs were randomly given a number only (no names) and your Board of Directors selected their favorites from the 16 choices. Not until after their favorite was chosen, was the designer revealed.

VFD Enviro-Check® Valves Noiseless

Add "VFD" to end of existing Flomatic part number, works for all applications even non VFD systems.

Patented submersible pump check valve for use on variable flow demand (VFD) systems and applications. Standard check valves will "chatter" and be noisy when the system goes to low flow, eventually causing failure.

These unique valves are designed to minimize flow losses and hydraulic shocks in the pumping system. The exclusive patented poppet system ensures that the valve smoothly and automatically adjusts to flow changes and is noiseless at very low flows.

VFD Tapped Valves

Excellent for all applications including non VFD systems.

Patented VFD Compatible CheckValves
(Now available in Ductile Iron and Stainless Steel 1" thru 8")
