The Advocate

Letter From The President
Michael T Anzalone CWD CPI

I hope everyone has had a wonderful summer and fall, winter sure seems to be upon us. What a beautiful time of year it is with the leaves changing and a crisp feeling in the air. Take some time to be outside and enjoy this time of the year. Thanksgiving is right around the corner then Christmas shortly after. One of my goals this year is to slow down a little and take time to appreciate my family and not take a single day for granted. I hope you all will do the same too, appreciate today and the people we will not have in our lives forever.

I am sure you all have been feeling the pinch of inflation and other issues with our economy the past year. Things are getting tougher and tougher in our industry as well as with almost every other. Remember to plan accordingly with your pricing and bids to accommodate for these influxes increasing price changes on supplies.

YOUR MEMBERSHIP MATTERS

A TEAM: Drillers, Pump Installers, Geologists, Engineers, Manufacturers, and Suppliers, all combined make up a very specialized group of individuals. Highly experienced and knowledgeable in their trades, these individuals are what make the UGWA the most valued Team of experts in the Ground Water Industry.

As a member of the UGWA, you will have many opportunities to network with other members, share ideas, techniques, and in some cases, even equipment. To build friendships that will last a lifetime and relationships that will ensure a strong and stable future for your business and interests in the Ground Water Industry here in the Great State of Utah.

Membership Types

A. CONTRACTOR/PUMP INSTALLER: Any person doing business and licensed to drill, either water wells, ground water monitoring and/or licensed to install ground-water pumping equipment.

B. MANUFACTURER/SUPPLIER: Any person engaged in the manufacturing of equipment, or materials used in the ground water industry or engaged in the sale of equipment or supplies associated with the ground water industry.

C. TECHNICAL: Any hydrologist, geologist, or engineer involved in teaching, research, consulting and or government services associated with the ground water industry.

D. ASSOCIATE: Any person engaged in the support of the UGWA who does not accurately fit in any of the above.
President’s Letter Continued

Times are tough and we all still need to pay our own bills and suppliers, stay in business and keep on drilling and pumping. Our industry directly sees and feels the impact of shipping, delivery and freight increases. It seems this is only getting worse as the months go on. Be prepared and aware as these seem to change almost overnight.

We have several fun things to look forward to coming up. In January we will have our annual UGWA convention in Mesquite, Nevada. This will be January 5th -7th, 2022. This has always been a fantastic and fun weekend for all involved. Remember to get your rooms reserved ASAP. The golf tournament is on Wednesday the 5th. You will want to make sure you have enough shotgun shells for the skeet shooting. Most places have a limit on the number of boxes you can purchase. You will want to have 4 or 5 boxes for this shooting event. This is always one of the most popular and favorite activities of the weekend.

UGWA elections are quickly approaching. If you would like to be a member on the board, please speak up soon. This is a great opportunity to find out more about what UGWA actually does and to help with future decision making in our organization.

I look forward to seeing you all after the first of the year in Mesquite. Until then, please be safe and take care of yourselves. A little self-care never hurts anyone. Take time to appreciate the small things, do something for yourself, and tell someone how much you appreciate them. Pay it forward, and that undoubtedly will come back to you several times over.

Believe in Yourself, Stay Strong, Never Give Up, Be Grateful, Work Hard, Stay Humble, Be Kind, & Keep Smiling.

Michael Anzalone
UGWA President

Joke of the month: The truth about water drilling.........The system is rigged!
SURFACE WATER & GROUNDWATER INTERACTION
AN EXAMINATION OF THE NATURAL AND MAN-MADE TIES THAT BIND THEM

2022 MCELLHINEY LECTURE
KEVIN MCGILLCUDDY, PG

Kevin McGillicuddy, PG, is the chief hydrogeologist for the Roscoe Moss Co. Specializing in groundwater development, he has designed several hundred high-capacity water supply wells, conducted numerous well siting studies, and managed large- and small-scale well rehabilitation projects. In his capacity as chief hydrogeologist, he assists consultants, municipalities, water districts, and contracting firms in the planning and designing of water supply wells.

Prior to joining Roscoe Moss, McGillicuddy worked as director of recharge operations and as a senior hydrogeologist for the Orange County Water District (OCWD) in Fountain Valley, California. While at OCWD, he engaged in groundwater replenishment projects utilizing both surface water recharge and direct injection of highly treated reclaimed water through a system of injection wells. McGillicuddy has presented at numerous NGWA, and other groundwater industry, events over the years promoting groundwater science, proper practice, and responsible use to a variety of audiences. He holds a B.S. in geology from Boston College and an M.S. in geology from the University of Southern California.

This presentation will provide an overview of the hydrologic cycle focusing on the interaction between surface water and groundwater through both natural means and engineered programs. How these factors enhance the recharge, storage, and development of surface water and groundwater resources will be addressed to supplement the groundwater professional’s knowledge and provide key explanations to clients.

Need Continuing Education Credits?

If you need continuing education (CE) credits to maintain your drill-er and/or pump installer license and are not sure what to do since the Mesquite 2021 UGWA convention has been cancelled, there are numerous other opportunities to get CE credits.

Due to the pandemic, Jim Goddard and the Utah Division of Water Rights DWR are more flexible in accepting applicable online training for CE credits. The DWR has numerous training videos that are accessible from their website www.waterrights.utah.gov, the direct link to the videos on their You Tube channel is here: (www.youtube.com/channel/UCLhX3rovw8Do_oU-AIybtWA).

If these videos don’t interest you, there are other online trainings that are approved by the DWR. You can contact Jim Goddard directly for help and any questions you may have.
