Hello All,

I hope everyone has had a safe and productive summer.

Fall is finally upon us, and I would be lying if I said I’m not excited about the expected snow in the mountains before Halloween. I personally enjoy playing in the snow and for reasons I can’t explain, I even enjoy shoveling snow. But above anything else, I hope for a heavy winter to give us a good snowpack and help replenish our lakes and reservoirs.

Fall also means that our annual conference is just around the corner. I encourage you to attend and invite others to attend this fun show at the Casa Blanca Resort in Mesquite, NV. It is a great opportunity to see old friends & make new ones, catch up on continuing education, hit some golf balls, and shoot some clays. You can register on our website at https://www.utahgroundwater.org

We will kick off with our annual golf scramble on Wednesday, January 4 followed by skeet shooting on Thursday morning. The conference will begin Thursday at 1:30 and run through Friday afternoon.
Join/Renew Today!

We will also be set up to sell raffle tickets for the ATV that will be given away at the Mountain States Groundwater show in Loughlin, NV in February. You do NOT need to be present to win, so you can purchase tickets at our show if you can’t make it to Loughlin or just want a head start on buying tickets. Tickets are limited so once they’re sold out, they’re gone. We want everyone to be able to participate in this giveaway to directly support our scholarship program. 100% of the proceeds goes to the scholarship fund. Look for more information at the show.

Aside from our show and Mountain States, the National Ground Water Association is hosting Groundwater Week in Vegas again this year on December 6-9th. A lot of great opportunities for fun and networking in the coming months! We hope to see you all soon.

Best regards,

Casey Curtis, ccurtis@hydroresources.com
President UGWA

YOUR MEMBERSHIP MATTERS

A TEAM: Drillers, Pump Installers, Geologists, Engineers, Manufacturers, and Suppliers, all combined make up a very specialized group of individuals. Highly experienced and knowledgeable in their trades, these individuals are what make the UGWA the most valued Team of experts in the Ground Water Industry.

As a member of the UGWA, you will have many opportunities to network with other members, share ideas, techniques, and in some cases, even equipment. To build friendships that will last a lifetime and relationships that will ensure a strong and stable future for your business and interests in the Ground Water Industry here in the Great State of Utah.

Fred Rothauge, CWD

Fred Rothauge has been in the drilling and drilling fluids engineering business for 40 years. He is a licensed water well driller in eight western states, past president of the Colorado Water Well Contractors Association, and current NGWA and The Groundwater Foundation board member. He has coauthored papers on drilling fluid products and is a coauthor for Johnson Screens’ third edition of *Groundwater & Wells*. Rothauge also serves on the board for the Mountain States Ground Water Association and is chairman of the American Ground Water Trust. He oversees drilling fluids and well rehabilitation along with serving as technical advisor for Hydro Resources.

**Are We Creating Long-term Groundwater Assets or Just Installing Wells?**

When drilling a well, the industry has historically focused on the installation price (as cheap as possible) to drill a well at a given point in time. Since the ultimate consumer is too often concerned only about the bottom line of what is perceived as a one-time purchase, the contractor must clarify the true nature of the water supply asset, to produce a change in the customer’s mindset. The contractor must actively educate the customer that they will be purchasing a long-term groundwater supply asset. This educational process includes sharing the well construction measures and materials that will extend the life of the well (asset) and augment the groundwater resource drawn from it. A well, like any other asset, is evaluated within a long-term life cycle that includes the initial planning and extends to the initial well construction vs. daily operation and maintenance, as well as replacement costs. Such planning and execution also require rethinking of well development and rehabilitation needs and costs. This change in perspective requires the scientist/engineer, suppliers and manufacturers, and other stakeholders to adjust their perspectives from “well” to “asset.”
